

SARAJEVO MEDICAL JOURNAL (SaMJ) - REVIEWERS INSTRUCTIONS

- Reviewers should respond whether the paper is written according to the journal's instructions, whether it meets the originality criteria, and whether it has an educational character (which we emphasize in the journal).
- Reviewers must not contact the authors (even if they recognize the institution where the research was conducted, although it is a double-blind peer review process) and must not use the paper for personal use.
- If reviewers seek the opinion of a colleague, this should be mentioned in the report.
- Reviewers are asked not to use Artificial Intelligence for reviewing the paper (if they do so, they must seek permission from the Editorial Board).
- Reviewers should complete the review within the agreed time frame (two weeks), and their comments should be honest, constructive, and polite.
- If there is a conflict of interest in the review, it should be highlighted.
